

ASM-AP-X

ApolloN

DESCRIPTION

Modern technology that is installed in unmanned technical locations depends much more on environmental

factors than ever before. ApolloN is specially designed to detect and monitor environmental factors within a critical

infrastructure and provides a complete solution in combination with the ASM Suite Software for monitoring these technical locations.

FEATURES

Easy on-site installation, no local configuration

Plug and play; prefabricated cabling

Flexible, practical and cost-efficient

Energy-saving technology

RJ45 connectivity

Fits into 19 or ETSI rack

Central management (SNMP)

ApolloN: Non-stop security

ApolloN provides non-stop, 24/7 security and monitoring. ApolloN particularly proves its services in the following market segments:

- Telecommunications
- Infrastructure & main ports
- Water management
- Drinking water
- Energy

ApolloN offers Access Control, Intrusion Detection and Monitoring (such as temperature, shock, water leakage, fire and humidity).

Access control

In contrast to normal offices and buildings, nobody is inside at the unmanned locations. Access to these

locations is only necessary for scheduled maintenance, expansion or during a calamity; so it is good practice that no one has rights to access except in the mentioned situations. By regulating access in this way, the risk of pollution, improper use, unplanned or undocumented modifications to the environment or the installation are significantly decreased.

Intrusion Detection and Monitoring

Monitoring the environmental factors is especially important in unmanned locations, since temperature, humidity, air flow, leakage, intrusion and fire directly affect the lifespan and reliability of the installation. By reporting deviations and alarms the system helps in preventing failures and damages and reduces operational costs. The sooner problems are detected, failures and losses can be prevented.

Housing		
Description	10 inch 1HE powder coated zincer h	aguring
Measurements	19 inch, 1HE powder coated zincor housing	
Weight	436 x 44.2 x 245 mm (W x H x D) 3,0Kg	
Weight	3,0Kg	
Controller		
Ethernet	10Base-T/100Base-TX /1000Base-T	
Management information	SNMP and iProtect	
Power		
Power consumption (no load)	76.8W	
Voltage	90-264VAC	
Current	1.5/115VAC 1A/230VAC	
Frequency range	47 ~ 63Hz	
Fuse	2A/T	
Туре	IEC, C14	
Environment		
Operating temperature	-20°C to +70°C at sea level (refer to output load de-rating curve)	
Working humidity	20 ~ 90% RH non-condensing
