571-0500

iProtect Site Software

DESCRIPTION

Manage all unmanned technical sites remotely from a single clear dashboard. It can be done with the iProtect Site software: a tool to anticipate deviating events at unmanned sites. Always in full control!

FEATURES

- Remotely in full control
- Good traceability
- Prevents carelessness and failure
- Customized installation

Access Control

iProtect Site software enables monitoring of the door position at each location and allows access to be granted remotely. Access cards can be created with specific rights for employees or permanent contractors.Monitoring

Of course, other factors may cause failure of critical processes at unmanned technical sites. Environment variables such as temperature, humidity and water level can therefore be shown at any time in the iProtect Site software.
