

EX-PTZ D SERIES

EX PTZ Dual Spectrum Camera 316L

DESCRIPTION

The EX-PTZ D camera housing is a rugged corrosion proof dual head camera station designed for use in onshore, offshore, marine and heavy industrial environments. The combination of thermal imaging and daylight cameras facilitates 24/7 remote camera surveillance and analytics. The camera housing is not sold separately, it is only available in combination with a Siqura daylight camera module, such as the 33x zoom BC822v2H3-AS, 22x zoom 4K BC980H2-AS, or 4x zoom BC840v2-M04-AS, a thermal module from the TC-336 or TC-640 series, and an interface/cable tail (INT-RJ)

FEATURES

Corrosion protected 316L stainless-steel

ATEX, IECEx, UKEX and INMETRO certified

Dual head camera for day- and night-vision

Grid protected germanium window (diameter 50 mm)

Suited for 9, 13, 19, 25, 35, 50 mm thermal lenses

IP66 / IP67

Integrated power supply (24, 115 or 230 Vac)

Integrated heaters and wiper

Electro-polished 316L sun-shields

Low maintenance

Description

Thermal imaging

The EX-PTZ D is fitted with a germanium window, which makes the camera suitable for long-wave infrared (LWR) thermal imaging. Siquira's TC-336 and TC-640 thermal modules are made to fit this camera. Its grid protected window is suitable for lenses from 9 mm up to 50 mm.

Day-light camera

The other head is fitted with Siquira's 30x zoom ip camera, the bc822v2H3-AS or 22x zoom 4K camera, BC980H2. This head is standard equipped with a wiper and prepared for a washer installation. A 10 litre pressurized washer tank can be obtained separately.

Corrosion free 316L construction

The dual head PTZ camera is made of corrosion proof 316L stainless steel suited to operate in salty or sulfur rich environments. The hard carbon coated germanium window is additionally protected by a 316L grid.

ATEX, IECEx, UKEX and INMETRO certified

The EX-PTZ D is fully certified for hazardous areas zone 1 and 2 for gas and zone 21 and 22 for dust for Europe (ATEX), world-wide (IECEx), United kingdom (UKEX), and for Brazil (INMETRO). The certification includes the thermal module from the TC-336 or TC-640 series and the daylight camera (BC822v2H3-AS or BC980H2 or BC840v2-M04-AS).

Integrated heaters

Both camera heads are fitted with a thermal controlled heater. It regulates the humidity inside the camera and prevents ice or condensation forming on the germanium or optical window.

Mechanical
