Description

Multi-encoder & multi-streaming

The camera can support dual streaming of H.265, H.264 or MJPEG. Multiple combinations of resolution, frame rate, and encoding can be configured to satisfy different live viewing and recording scenarios.

High Efficiency Video Coding (HEVC)

H.265 or HEVC is a video compression standard, the successor of H.264. In comparison H.265 offers about double the compression ratio at the same level of video quality, or substantially improved video quality at the same bit rate. Thus saving bandwidth and recording space.

Open standards

The FD2002F2-EI can easily be integrated in a video management system using either Siquira's open Programming Interface (SPI) or ONVIF. The fixed dome camera is listed for ONVIF Profile S and Profile G.

Video analytics

The camera features an extensive set of intelligent video analysis tools to assist the operator detecting any anomalies. This camera features among others, behavior analysis and face detection.

Image enhancement

The FD2002F2-EI features smart IR with built-in IR illumination for 30 m, BLC and 3D noise reduction to improve the image quality and exposure quality.

Ease of installation

The extreme compact dome camera can be fitted almost anywhere. It is fitted with a break-out cable to make installation easy.
