

SA-PTZ D SERIES

Safe Area PTZ Dual Spectrum Camera 316L

DESCRIPTION

The SA-PTZ D camera housing is a rugged corrosion proof dual-head PTZ station designed for use in hazardous areas in onshore, offshore, marine and heavy industrial environments. The combination of thermal imaging and daylight cameras facilitates 24/7 remote camera surveillance. The daylight camera controls the movement of the camera (PTZ). The camera's large germanium window suit all thermal modules from 7.5 mm to 100 mm. The housing is not sold separately, it is only available in combination with a Siqura daylight camera module, such as the BC822v2H3-AS or BC980H2-AS, a thermal module TC-336 or TC-640, and an interface (INT-RJ).

FEATURES

Corrosion protected 316L stainlesssteel

Dual head camera for day and night-vision

70 mm DLC/AR coated germanium window

Supports all thermal modules from 7.5 to 100 mm

Ingress protection rating IP66 and IP67

360° Continuous rotation, -90° to +90° tilt range

Integrated power supply (24, 115 or 230 Vac)

Integrated heaters and wiper (daylight camera)

Electro-polished 316L sun-shields

Low maintenance

Description

Thermal imaging

The thermal head of the SA-PTZ D is fitted with a germanium window, which makes the camera suitable for long-wave infrared (LWR) thermal imaging. Siqura's TC-336 and TC-640 thermal modules are made to built in this camera. Its large window size (70 mm in diameter) make it suitable for lenses up to 100 mm.

Day-light camera

The day-light head of the SA-PTZ D can be fitted with Siqura's 30x zoom ip camera, the bc822v2H3-AS or the 22x zoom 4K BC980H2-AS. This head is standard equipped with a wiper and prepared for installing a washer hose and nozzle. A 10 liter washer tank with pump and hose is sold separately.

Corrosion free 316L construction

The dual head PTZ camera is made of corrosion proof 316L stainless steel suited to operate in salty or sulfur rich environments. The germanium window is treated with a special hard diamond like coating to protect it against scratches and chemical substances.

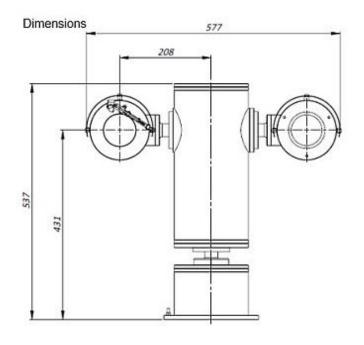

Integrated heater

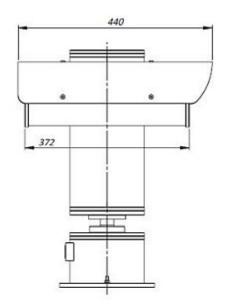

The built-in heater regulates the humidity inside the camera and prevents ice or condensation to form on the camera's window.
