

# UP22-4K

Upright PTZ, 4K 22x zoom, 24 Vac

## DESCRIPTION

The Upright PTZ (UP22-4K) is a high-precision, full-featured Ultra HD (4K, 8Mpixel) network PTZ camera providing high-quality, ultra sharp images. The integrated 22x optical zoom in combination with the UHD resolution, and its gyro-based embedded image stabilization makes the camera ideal for traffic applications.

## FEATURES

---

1/1.8" Progressive CMOS

---

22x Optical and 10x digital zoom,

---

8 Mpixel @ 30 fps resolution

---

Quad H.265/H.264/MJPEG streaming

---

120 dB WDR (HDR)

---

Day/Night with IR-cut filter

---

Variable pan and tilt speed,  
proportional zoom

---

Continuous rotation, tilt from -90° to  
+40°

---

Preset accuracy of 0.1°

---

Corrosion Proof, IP66

---

ONVIF Profile S, G and T

---

## Description

### Construction

The robust construction using cast aluminum and durable plastics ensures accurate positioning and stable video, close by and at large distances. The UP22-4K is made to operate under extreme temperatures for mission critical applications. It is tested and approved according the environmental requirements of NEMA TS-2.

### 22x zoom and 4K UHD

The UP22-4K can stream an ultra high-definition video stream with razor sharp images. In combination with the optical 22x zoom this results in images with a quality comparable to a convectional 1080p camera with 44x optical zoom. The auto-focus is fast and precise over the whole zoom range.

### Multi-stream high definition

The camera has quad-stream capability for simultaneous streaming of H.265, H.264 and/or MJPEG. Multiple combinations of resolution and frame rate can be configured to fit different scenarios. 8 Mpixel (4K) resolution is available at 30 fps, two full-HD 1080p streams at 60 fps can be combined with a low resolution stream.

### Image enhancement

The UP22-4K provides HDR or dual shutter WDR for extreme dynamic range for use in bright-light situations. Back-light or high-light compensation enhances image visibility in difficult lighting situations. With a built-in gyro the UP22-4K minimizes the effects from vibration to ensure the sharp and smooth video.

### Cybersecurity

At the first login attempt, it's compulsory to set up a strong password to a certain level. Using HTTPS SSL/TLS 1.2, web browsers and video streaming can be protected within a secured communication channel. The security boundaries are set using multi-level user management and system log records every configuration change as well as login attempts as the track. Network access is protected by IEEE 802.1x port-based authentication with EAP/TLS or EAP/PEAP.

### ONVIF

Multiple options are available to easily integrate the UP22-4K to a video management system. In support of open standards, the camera is compliant with the ONVIF Profile T and Profile S for streaming compatibility with other VMS's, and Profile G for local

storage compatibility.
