

UP36D

Upright dual sensor PTZ 36x zoom

DESCRIPTION

The Dual sensor Upright PTZ (UP36D) is a high-precision, full-featured network PTZ camera providing high-quality, high-definition optical images, combined with thermal imaging. The integrated 36x optical zoom in combination with the thermal sensor makes the camera ideal for 24/7 intrusion detection, hot-spot detection and other high-risk applications. The UP36D must be ordered in combination with a TC-336 or TC-640 thermal core. It supports all thermal lenses up to 60mm

Description

Construction

The robust construction using cast aluminum and durable plastics ensures accurate positioning and stable video, close by and at large distances. The UP36D is designed to operate under extreme temperatures for mission critical applications.

Ultra low-light performance

The 36x zoom is fitted with a 1/2 inch ultra low-light sensor, it produces high quality color images even under low light conditions. No more slow-shutter smearing of movement (ghosting) or unclear noisy images.

Thermal imaging

Next to the optical sensor an uncooled thermal sensor is fitted for night-vision or thermal imaging. Depending on the application the UP36D can be fitted with a wide range of thermal sensors and lenses, varying from 7.5mm wide-angle to 60mm tele. For accurate hot-spot measurements, such as smoldering detection, the camera can be fitted with special radiometric thermal sensors.

Multi-stream high definition

The UP36D has multiple stream capability for simultaneous streaming of one or more H.264 or MJPEG streams. Two independent H.264/MJPEG encoders per sensor can generate full-HD 1080p video streams at full frame rate. Multiple combinations of resolution and frame rate can be configured to satisfy different live viewing and recording scenarios.

Open standards

Its compliance to open standards ensure that the UP36D is compatible with the most common VMS's out of the box. If you need to incorporate the camera's special features in your dedicated client software, the Programming Interface offers an easy HTTP API for guaranteed interoperability. The camera will be ONVIF profile S compliant.
