Sirius iX30 reader
Ready for the future

Our Sirius reader is renewed. The hardware of the Sirius iX30 reader has been completely redeveloped and the casing has also been modified. You will find the main advantages written below. The reader is now prepared for the future, so in the near future your customers don't need a card or tag anymore to open the doors in their business environments. They can then easily do this by using their own mobile phone.

The Sirius iX30 reader has the same features as its predecessor, Sirius i30, with some interesting additions:

Highlights Hardware

> Equipped with two new functionalities

- Buzzer controle
- Tamper output

> You can easily remove the connector, so during installation you can already connect it to the wiring in the wall

> Dip switch is added to prepare the reader for the future

> Communicate through Bluetooth Low Energy (BLE)

Highlights Casing

> Easy to install by Click&Go system

> Fully interchangeable with Sirius i30

> Improved scratch resistance
