CHOOSE YOUR MODULE:

TANlock 3

Through individual authentication modules (TAM), TANlock 3 can be adjusted to nearly every customer requirement. The TAMs (TANlock Authentication Modules) can be replaced and changed to whatever authentication method is needed, even after years.

Through the many standard interfaces, you can easily set up the TANlock 3 to your IT infrastructure. In a consistent way there is no administrative software needed.

- Additional Features:*
- PoE: Power over Ethernet • HTTPS • Syslog • MS Active Directory • LDAPs • RESTful API • Web API • SNMP
 - External sensors like temperature, humidity over CAN-Bus

TANlock 3

- PIN + RFID
- Hand Vein Scan
- Remote
- Fingerprint Scan
- Touch Display

YOUR TANlock 3

- Hand Vein Scan**
- Highest security level through hand vein detection via PalmSecure

- PIN + RFID**
- Two-factor authentication
 - Authentication via PIN or RFID(13,56 MHz)
 - Legic Advant, HID iCLASS, Mifare Desfire EV1, EV2
 - BTLE (Bluetooth Low Energy)

- Remote**
- Remote access

- Fingerprint Scan**
- Biometric procedure protects from abuse

- Touch Display**
- Authentication through entry at the touch display
 - Displays operation parameters like temperature, humidity, ...
